

Smart Transport

Isotrak ELD powered by AddSecure

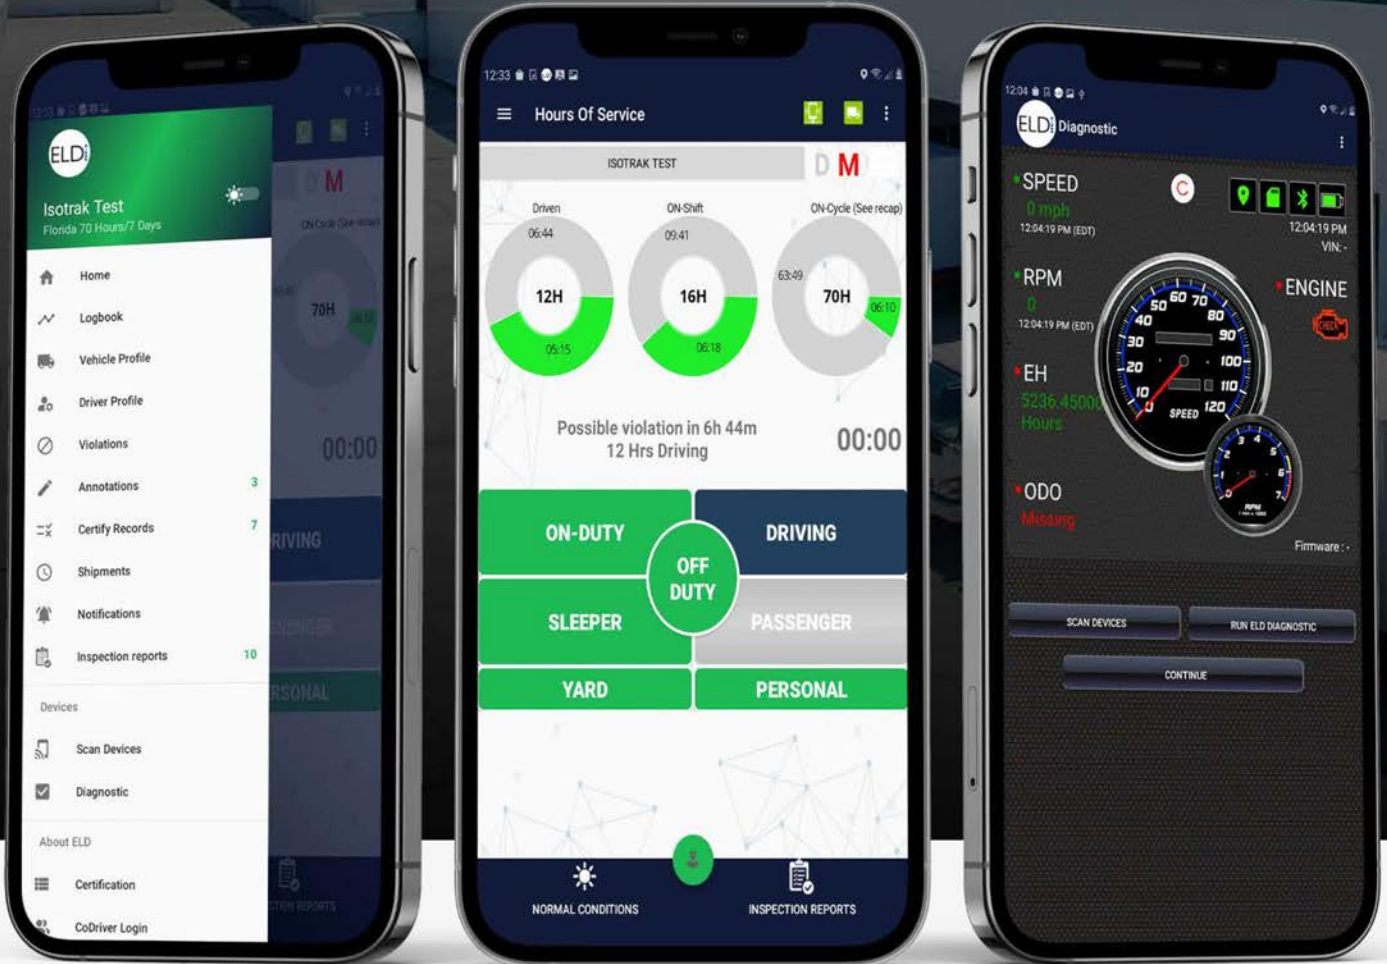

The Industry leading ELD solution. Certified with Transport Canada and Mexico in addition to meeting Federal, State & US exemptions.

For a safer and smarter world

Introduction

Your Telematics & ELD Provider

Prevent HOS violations & ensure DOT compliance

Compliance	Telematics	Dispatch
Dashcam	IFTA	Diagnostics
DVIR	Integration	Controls

Connecting you to a world of safety & compliance

Compliance

Pioneers in ELD solutions (third ELD provider listed by FMCSA). The most driver-friendly easy-to-use ELD solution meeting Transport Canada and Mexican regulations, in addition to federal, state & US exemptions.

Driver Safety

Vehicle usage during allowed hours only, high definition (artificial intelligence) dash cams triggered by critical events (smoking, on the phone, fatigue, distractions, lane departure warning, forward collision warning and headway warning).*

In addition to ELD...

Real-time, exact vehicle location, route calculation and monitoring, engine diagnostics, temperature and fuel monitoring, dispatching and open API for third-party system integration.

About AddSecure Smart Transport

At AddSecure, we see it as our mission to help make the world safer and smarter. We serve over 50,000 business customers and partners globally with premium solutions for secure critical communications and data.

Through the power of connected vehicle technology, we help businesses digitally transform their fleets, with access to key operational data in real-time, enabling them to meet the increased demands from transport buyers, global e-commerce and sustainability.

- Multi-driver, multi-truck support

Features & Benefits

Engine diagnostic including FMI code

IFTA Reports

Fully compliant with regulations

* Does not support non ECM vehicles

Open API for third party integrations

Isotrak ELD

by ADD SECURE

Connect

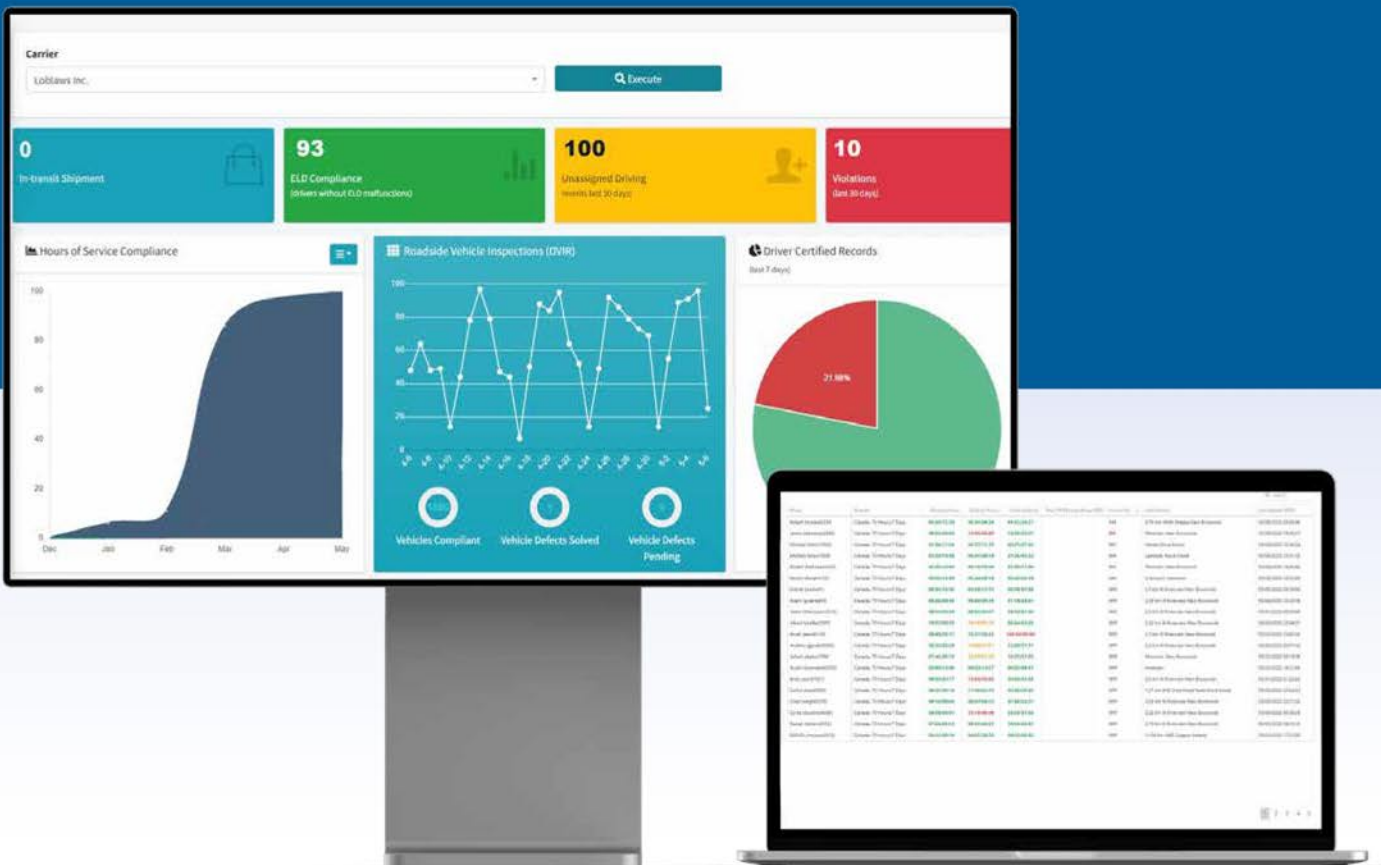

Connecting drivers, dispatchers, brokers, fleet managers, shippers & receivers

Driver share shipment information with broker, shipper and receiver. Warehouse personnel assign dock number, time of arrival, nearby safe parking and additional notes. Instant notifications to drivers and carriers keep all parties connected.

Features & Benefits

Keep compliance simple

Stay updated on your driver's Hours of Service with AddSecure's all-in-one ELD solution. Our user-friendly app allows drivers to quickly and accurately complete e-logs and input their duty status. Additionally, driving status automatically updates when a direct bluetooth connection is established between the app, and onboard ELD telematics device. Even in remote locations.

Prevent HOS violations

Protect your drivers CSA scores against Hours of Service infringements with real-time alerting of any impending driving time violations. Set custom threshold alerts via SMS/email.

Telematics integration

Isotrak's web-based telematics platform displays historic and live driver HOS data. Real-time visibility on available driver hours allows you to maximize productivity.

Master DOT inspections

Drivers have total confidence with DOT inspections when HOS logs are automatically audited. In-built device connectivity enables your drivers to send their HOS logs direct to DOT compliance officers via e-mail.

Camera Systems

High definition (AI) dash cams

-  Forward collision warning
-  Smoking detection
-  Vehicle distance warning
-  Phone call detection
-  Driver fatigue
-  Lane departure
-  Driver distraction
